1. The following is an examiner's statement of reasons for allowance:

Besides the teachings of Lee et al (US 6415742) discussed in the last Office action, Janning et al (US 6166643, of record) is noted as teaching the defining of boundaries or exclusion zones in the vicinity of transmitters 17, which are placed alone or in combinations at various locations inside and outside a dwelling (note e.g. zones A-E, and boundary 33), such that receiver/stimulator units 14 worn by "household" animals (e.g. 12,12') selectively administer appropriate aversive stimuli to the associated animal in response to receiving a transmitted signal, wherein "different animals (are) subjected to different boundary constraints" (col. 9, lines 36-38 and col. 12, lines 29-31) by transmitting different "identifiable codes" from different subsets of the transmitters 17, such that a given animal's receiver unit 14 responds to only a selected one(s) of the transmitter codes, while a different animal's receiver unit 14' responds to some other selected one(s) of the transmitter codes. However, neither Janning et al nor Lee et al (nor their combination, nor any other art of record) is considered to teach or suggest at least "a memory for storing an identifier...associated with one of a plurality of animals in a household", as a component of either the receiver worn by the animal or the transmitter providing the "repeated", "automated" animal control signal.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
